ALU-Plus 1241

ALU-PLUS 1241 is a waterproof light with integrated LEDs and optics diffuser 140°. Suitable for many applications: home and industrial applications, car parks and underground public areas. The IP65 rating makes it suitable for both indoor and outdoor applications. Extruded aluminium and polycarbonate body with anti-glare diffuser, vandal and flame retardant. Strong structure thanks to the reinforced frame. Stripped diffuser for uniform light distribution. The smooth surface facilitates cleaning process, important for constant light efficiency. The power supply can be from 90Vac to 265Vac, this also help to keep constant light distribution even during voltage fluctuations. Equipped with fast connections system with 2P + T, both for input and output. ALU-PLUS 1241 is also available on request with integrated Emergency Kit with two hours time operation.
