HL LED is a very high density LED strip with CRI Medio 95 and CRI Minimo 90, the LEDs managed are the innovative SMD 2110. These, together with an innovative and optimal welding system that still has the LED on the board, means that the mechanical resistance and consequently of the electrical contacts bear stress up to 27 Newtons against the traditional strips that bear at most 5/7. This can be set on surfaces that have curvatures greater than 10 cm in diameter and can observe right angles. Four colors available, 2700K, 3000K, 4000K and 6000K.

A wide range of power supplies with different sizes and regulators is available, such as: button or rotation dimmers, 0-10V dimmers, DALI dimmers and DMX dimmers. Our aluminum profiles complete with covers, opals, semi-opals and transparent are indispensable for laying.

Codice	Color temperature	Cut Minimum	Maximum lenght	Volt	Watt / 1mt	Watt / 5mt	lumen output	LED / 1mt	LED / 5mt
LS5012-RWW	2700K	50 mm	5000 mm	24Vdc	12W	60W	1788 lm/m	140 LED	700 LED
LS5012-VWW	3000K	50 mm	5000 mm	24Vdc	12W	60W	1800 lm/m	140 LED	700 LED
LS5012-NW	4000K	50 mm	5000 mm	24Vdc	12W	60W	1812 lm/m	140 LED	700 LED
LS5012-W	6000K	50 mm	5000 mm	24Vdc	12W	60W	1848 lm/m	140 LED	700 LED

Maximum connected meters 5
Strip complete with 3M double-sided adhesive
